

# Programable Logic Controllers

TLC has extensive PLC programming experience with a wide variety of programmable logic controllers (PLC). Our PLC manufacturer of choice is Allen-Bradley. We have integrated Allen-Bradley PLCs into our control systems since beginning in the 80's with the SLC-100, progressing to the SLC-500 and MicroLogix series and now the ControlLogix series. No matter which PLC is specified, you can be confident having TLC as your PLC system provider.

## Allen-Bradley PLCs

- ControlLogix 1756 high performance
- CompactLogix 1769 mid-range applications
- SLC500 modular family of controllers, small to mid-range applications
- Micrologix 1100, 1200, 1400, 1500 smaller applications

## Automation Direct PLCs

- DirectLogic 06 smaller
- DirectLogic 205 small to mid-applications

## Eaton PLCs

- ELC Modular Controllers small to mid size applications
- EZ500/700/800 intelligent relays - very small application

## General Electric PLCs

- Versamax IC200CPU high performance
- Series 90-30 mid range
- Micro Nano smaller applications

## Idec PLCs

- MicroSmart mid applications
- MicroSmart Pentra small applications
- SmartRelay very small applications

## Schneider Electric PLCs

- Modicon Momentum PLC midsize applications
- Concept PLC small and mid

## Siemens PLCs

- Simatic S7 mid range to high performance
- Logo logic module very small applications
